

InGaAs PIN Photodiode

InGaAs PIN PD is suitable for receiving the light wavelength range of 1100 to 1600nm. This photodiode features high efficiency, low dark current and low capacitance for high speed optical fiber communications. They operate at 1310nm or 1550nm wavelength band and various data rates from 155Mbps up to 2.5Gbps. They are hermetically sealed TO-46 package with lens cap or flat window cap.

(Ta=25°C)
